

Family Tree (30 minutes)

- Provide groups of 4 with strips of butcher paper, pencils/markers/crayons/highlighters
- Go through Genesis and, have them create a family tree, marking well-known characters who appear in the book
- This could be as detailed, or as basic as desired. Some items that could be included depending on what kind of study such a family tree would support could include:
 - Include age
 - Occupation
 - Significant encounters with God
 - Blessings from generation to generation
 - Sins from generation to generation
- This activity would also be interesting to do in relation to Matthew's Genealogy of Jesus
- This activity would also be interesting for churches who are going through a curriculum seeking to read the bible in a year such as: The Story or The One Year Bible
