

Map it Out: Abraham's travels (25 minutes)

From a project prepared by Linnea Ek
Ministry with Adults

- Provide groups of 4 each with a large blank map (either poster board sized or even projected/traced onto larger paper on the wall), bibles and other resources the church may have that would be helpful in addressing this task
- Invite the groups to start in Genesis 12 (possibly giving chapters/sections to teams) and chart the geographical journey of Abraham. They should not only plot the city, but also provided a summary of what was happening in Abraham's life during his time at that location.
 - Additional information to research or note could include:
 - Who was with Abraham at each location
 - How long Abraham was in that location
 - If the name of the location has special significance in relation to Abraham, the future nation of Israel or the people inhabiting the land at the time

Sample map for *Map it Out* activity

Map would either be copied to poster board or copied onto a larger piece of paper on the wall. The city names and locations could be removed to give practice locating the city locations.
